

Network Assessment

A comprehensive overview
of your network infrastructure

Elizabeth Hodges
Network and Security Lead
Telstra Purple EMEA

Empower your network to drive business technology change

A Telstra Purple Network Assessment provides a thorough understanding of the network environment, identifying short-term issues around performance, resilience and security. The assessment can also be tailored to drill down on the areas that are important to you. Using specialist tools, layer 7 traffic flows can also be identified and analysed to gain an understanding of the specific demands on your network infrastructure.

Benefits

- › Provides accurate and up to date layer 1 to 3 knowledge of your environment
- › Discovers the applications in use on the network
- › Assesses the hardware and software lifecycle
- › Delivers insight into the current state of a network environment in terms of security, connectivity, performance, resiliency and scalability
- › Provides an understanding of the network lifecycle against future initiatives, such as cloud adoption, unified-comms, and mobile working

Deliverables

- › Current state baseline of network topology
- › Defect register that prioritises any issues found
- › Recommendations for improvement, with corresponding levels of effort calculated
- › Recommendations around aligning network strategy with future strategic business objectives.
- › Layer 7 application analysis that provides insight into traffic flows and types across the network

Network Assessment Options

The Telstra Purple Network Assessment can be tailored to suit your needs:

QuickStart

The Network Assessment QuickStart is a cost-effective way of gaining rapid insight into the key areas of the network environment:

- › Layer 1 to 3 Topology
- › Resiliency
- › Scalability
- › Asset Inventory

Full Assessment

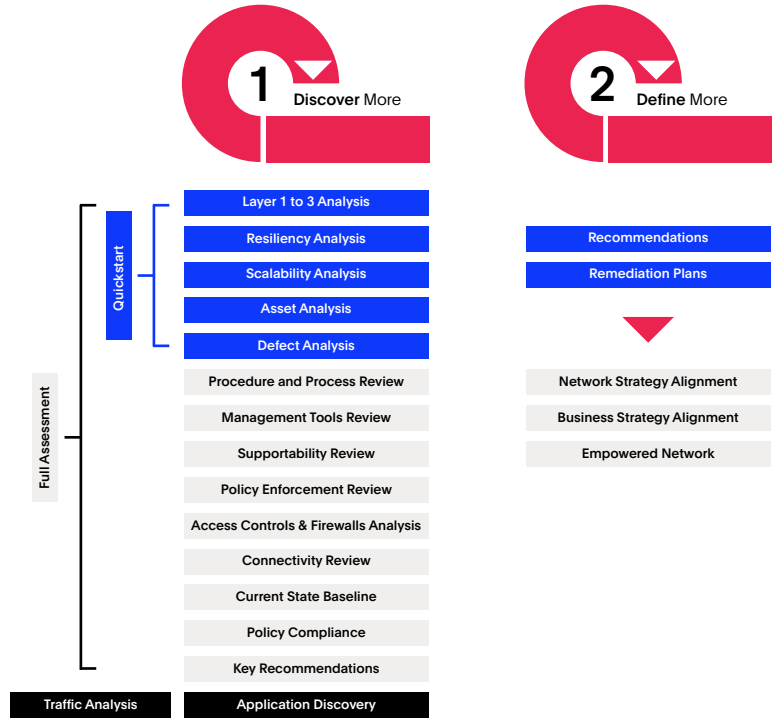

The full assessment includes all of the QuickStart items and can also be customised with any or all of the following items to provide a tailored service that meets your specific needs:

- › Device Hardening
- › Vulnerability Scans
- › Access Control & Firewalls
- › Procedures & Processes
- › Management Tools
- › Network Support Services
- › Network Supportability
- › Policy Enforcement
- › Accountability & Authentication
- › External Connectivity

Network Traffic Analysis

This option provides detailed analysis of the application traffic flowing over the network in order to identify usage patterns and understand demands on the network. This can be delivered as a stand-alone piece of work, or it can be completed alongside the QuickStart or Full Assessment.

- › Application Discovery
- › Traffic Profiling
- › Service Bottlenecks
- › Quality of Service Performance

About Telstra Purple

1,500+
Experts

A team of 1500 technology experts across the globe specialising in network, cloud, security, collaboration, mobility, software, data and analytics, and design.

4
Regions

Built on a foundation of acquisitions we are a powerhouse of demonstrable experience and expertise. We're committed to collaboration. We bring the best people across our organisation together with yours to design, build and deliver outcome-based solutions.

Best in Breed Partnerships

We've built strong global partnerships with industry leading vendors including Microsoft, AWS & Cisco but always deliver purpose-built solutions, with people at the centre.
