

# Security and Threat Assessment

Understanding your organisation's  
current security state and risk profile

**Manoj Bhatt**  
Head of Cyber Security  
Advisory and Consulting

## Why undertake a Security and Threat Assessment?

- › Understand your current risk profile through a rigorous assessment of your internal security capability
- › Understand your alignment to ISO27001, Cyber Essentials and Cyber Security Framework
- › Align with and assist in managing compliance
- › Develop a prioritised list of threats specific to your business, industry and digital footprint
- › Assess and utilise any existing security metrics or reporting
- › Receive pragmatic and easy to digest advice to reduce your risk

## Telstra Purple's Security and Threat Assessment (SATA)

- › Strategic advice to address business priorities and evolving security threats
- › A threat assessment with a clear and prioritised list of internal and external threats as well as likely threat actors
- › A security assessment signposted to multiple compliance frameworks and rated using the CMM model
- › A summary review, suitable for C-level stakeholders or the board, showing the current state of security and highlighting any major risks
- › A detailed set of guidance and advice on the priorities and implications to address major security gaps and risks

## Thorough and Actionable Assessment

Our Security and Threat Assessments delivers a high value, thorough and actionable assessment as well as providing advice for clients wanting to understand and improve their existing security capability and risk profile.

Telstra Purple will assess an organisations threat profile, conduct a current state security review and host a vulnerability assessment and penetration testing. The result of these activities will produce an organisation’s CMM score, which Telstra Purple consultants will present to key client stakeholders with the opportunity for Q&A.

## Why Telstra Purple?

We believe it’s people who give purpose to our technology, and it’s the power of purposeful technology that inspires people. Putting purpose and people at the core of everything we do brings a brilliantly connected future closer to your reach.

Today’s ever-expanding digital landscape poses a growing number of security threats to organisations and their employees, and it can be challenging to identify, implement and maintain the right safeguarding measures. Our team of highly skilled and experienced Security Consultants and Engineers work with our clients to protect what is unique to them, whilst enabling them to focus on their core business.

“ All organisations, regardless of sector or size, need to understand the maturity of their security function and the reality of threats to their business ”

## About Telstra Purple

A team of 1500 technology experts across the globe specialising in network, cloud, security, collaboration, mobility, software, data and analytics, and design.

Built on a foundation of acquisitions we are a powerhouse of demonstrable experience and expertise.

We’re committed to collaboration. We bring the best people across our organisation together with yours to design, build and deliver outcome-based solutions.

We’ve built strong partnerships with industry leading vendors including Microsoft, AWS & Cisco but always deliver purpose-built solutions, with people at the centre.
