Telstra Purple

SD-WAN QuickStart

Are you ready to embrace SD-WAN? Is your infrastructure as ready as you are?

Rob Robinson
Director of Network and
Security Services
Telstra Purple EMEA

Why engage on a QuickStart?

› Drive your understanding of the cost savings, flexibility and capabilities of SD-WAN.

› Perform an SD-WAN readiness assessment to identify requirements to adopt SD-WAN.

› Capture your current WAN infrastructure and application usage.

› Provide a high-level migration cost estimate.

› Define a strategic roadmap identifying in-flight and planned projects that could impact the WAN.

› Identify risks and issues in advance of any planned migration.

QuickStart services

› **Discover:** Review in-scope infrastructure and applications.

› **Assess:** Current environment assessment, existing technologies review, high priority technical and business in-flight projects.

› **Recommend:** Identify potential costs savings and next steps recommendations to provide a strategic roadmap along with high-level implementation costs.

› **Follow-Up Engagement:** Detailed SD-WAN Planning.

The Case for an SD-WAN QuickStart

Whether this is your first foray into software defined infrastructure or whether you are looking to assess your readiness to move away from static and traditionally expensive MPLS, we will work with you to define a roadmap to deliver your SD-WAN strategy. The SD-WAN QuickStart helps you fast-track your decision making, with expertise that assesses the suitability of your environment in adopting SD-WAN. By analysing your existing network and security infrastructure along application traffic, Telstra Purple can determine whether SD-WAN can help you deliver a flexible, cost effective network that supports the business.

The SD-WAN QuickStart Process

Telstra Purple will hold workshops with your team to analyse and understand your existing infrastructure, reviewing connectivity, latency, performance, processes, management, security and policies. We will then work with your organisation to understand any commercial drivers which could help shape your SD-WAN journey.

We will undertake a range of discovery activities depending on your current and target operating models. An SD-WAN readiness report will be produced to document at a high level your infrastructure and applications allowing us to produce next steps and recommendations.

About
Telstra Purple

1,500+
Experts

A team of 1500 technology experts across the globe specialising in network, cloud, security, collaboration, mobility, software, data and analytics, and design.

4
Regions

Built on a foundation of acquisitions we are a powerhouse of demonstrable experience and expertise. We're committed to collaboration. We bring the best people across our organisation together with yours to design, build and deliver outcome-based solutions.

Best in Breed Partnerships

We've built strong global partnerships with industry leading vendors including Microsoft, AWS & Cisco but always deliver purpose-built solutions, with people at the centre.
