Building your Security Target Operating Model

Aligning and enabling business objectives with effective security
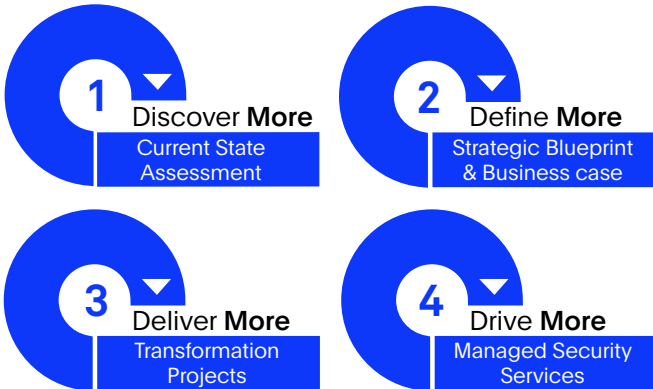

Rob Robinson
Security Lead, Telstra Purple EMEA

What is the importance of a Security Target Operating Model?

› Ensure your business is compliant against regulatory frameworks
› Understand the gaps that exist today and the recommendations required to meet these gaps
› Align your business goals with security objectives to nurture a secure and scalable business
› Define the service characteristics of a strong security practice which is aligned to people, process and technology
› Create a blueprint of your future security state
› Roadmap the transformation and key milestones to achieving security maturity
› Understand the transition plan required to meet security objectives
› Gain a business case for the investment in security **controls across people, process and technology**

4D Methodology

Telstra Purple have built a robust 4D methodology, which provides predictable, repeatable outcomes for IT change.

1 Discover **More**
Current State Assessment

2 Define **More**
Strategic Blueprint & Business case

3 Deliver **More**
Transformation Projects

4 Drive **More**
Managed Security Services

During Phase 2 of this methodology, Telstra Purple will both assess and define business and regulatory requirements, which then be built out into people, process and technology service characteristics. These are mappe across the organisation and an operating model is created along with a transition plan to reach the optimised state.

Why Telstra Purple?

We believe it's people who give purpose to our technology, and it's the power of purposeful technology that inspires people. Putting purpose and people at the core of everything we do brings a brilliantly connected future closer to your reach.

Today's ever-expanding digital landscape poses a growing number of security threats to organisations and their employees, and it can be challenging to identify, implement and maintain the right safeguarding measures. Our team of highly skilled and experienced Security Consultants and Engineers work with our clients to protect what is unique to them, whilst enabling them to focus on their core business.

By defining the operating model and service characteristics, you achieve a common understanding of goals, roles and processes – and a strong foundation for change.

> " Ask us how we've helped customers like Skanska, NSPCC and Opel Vauxhall Finance reimagine their operating model. "

About Telstra Purple

A team of 1500 technology experts across the globe specialising in network, cloud, security, collaboration, mobility, software, data and analytics, and design.

Built on a foundation of acquisitions we are a powerhouse of demonstrable experience and expertise.

We're committed to collaboration. We bring the best people across our organisation together with yours to design, build and deliver outcome-based solutions.

We've built strong partnerships with industry leading vendors including Microsoft, AWS & Cisco but always deliver purpose-built solutions, with people at the centre.
