# Telstra Security Services

Powered by Telstra Purple

Today's ever-expanding digital landscape poses a growing number of security threats to businesses around the world. But it can be challenging to identify, implement and maintain the measures required to safeguard organisations, and ultimately, protect their brand reputation. What you need or want to protect is unique to your organisation—the number and variety of assets, workforce information, competitive landscape, and the data you hold. The security solution that will help safeguard your business today and into the future is one that's built specifically for changing needs.

Introducing Telstra Security Services powered by Telstra Purple

Telstra Security Services powered by Telstra Purple, jumpstarts your security journey by reviewing your current security posture to gain insight on what your business values most. From there, we'll help you develop a strategy aligned to your security maturity and organisational goals over the next two to five years.

Designed with versatility in mind, Telstra Security Services enables organisations of all sizes to focus on the core business while highly trained, experienced consultants and engineers manage your security demands.

Wherever you are in your security journey—discovery, design or delivery—we will work with you for the solution that best fits your organisation.

Benefits

The right fit for your organisation

Telstra Security Services powered by Telstra Purple is a bespoke, multi-layered solution built on tried-and-tested structures, with a customised strategy aligned to compliance, legislation and industry standards.

Customised protection for peace of mind

Have the peace of mind that your organisation is protected— from your network and devices to your brand and reputation. And because Telstra Security Services is contextually mapped and strategically built around your threat profile, you can be assured that threats can be swiftly addressed as they arise and exposure to risk is minimised.
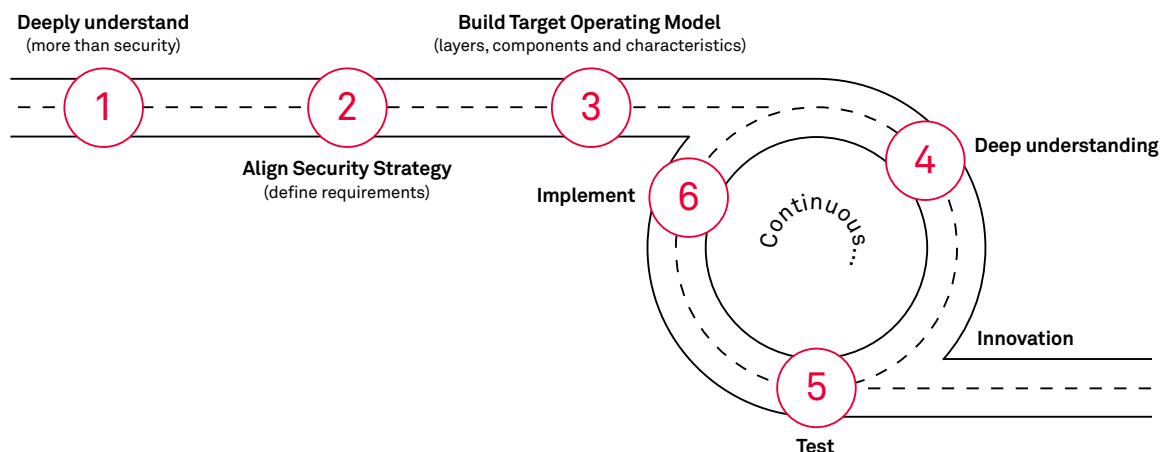

Digital transformation rooted in a logical, pragmatic approach

We take a logical and pragmatic approach to solution adoption and deployment to help your organisation navigate the complexities of the security landscape. This gives you clear visibility of solution functions and any risks we might encounter along the way, and helps set up a vision for your organisation's digital transformation journey.

End-to-end solution that grows as your business does

From understanding your unique security needs to designing, building, and managing your solution, our experts will guide you through your journey. We've made sure that our Security Services are flexible to empower you to scale services up and down as needed, so you can continue relying on it even as your organisation and the landscape surrounding you change.

How it works

We map Security Services to the security lifecycle of your organisation, so you can get the solution that best fits your changing needs in an evolving digital landscape.

1. Discover More

We'll conduct an assessment to address uncertainty around your current state, identifying any risks and gaps.

2. Define More

A strategic blueprint and business case illustrate the future state of your organisation's security posture, and help guide you through the transition period.
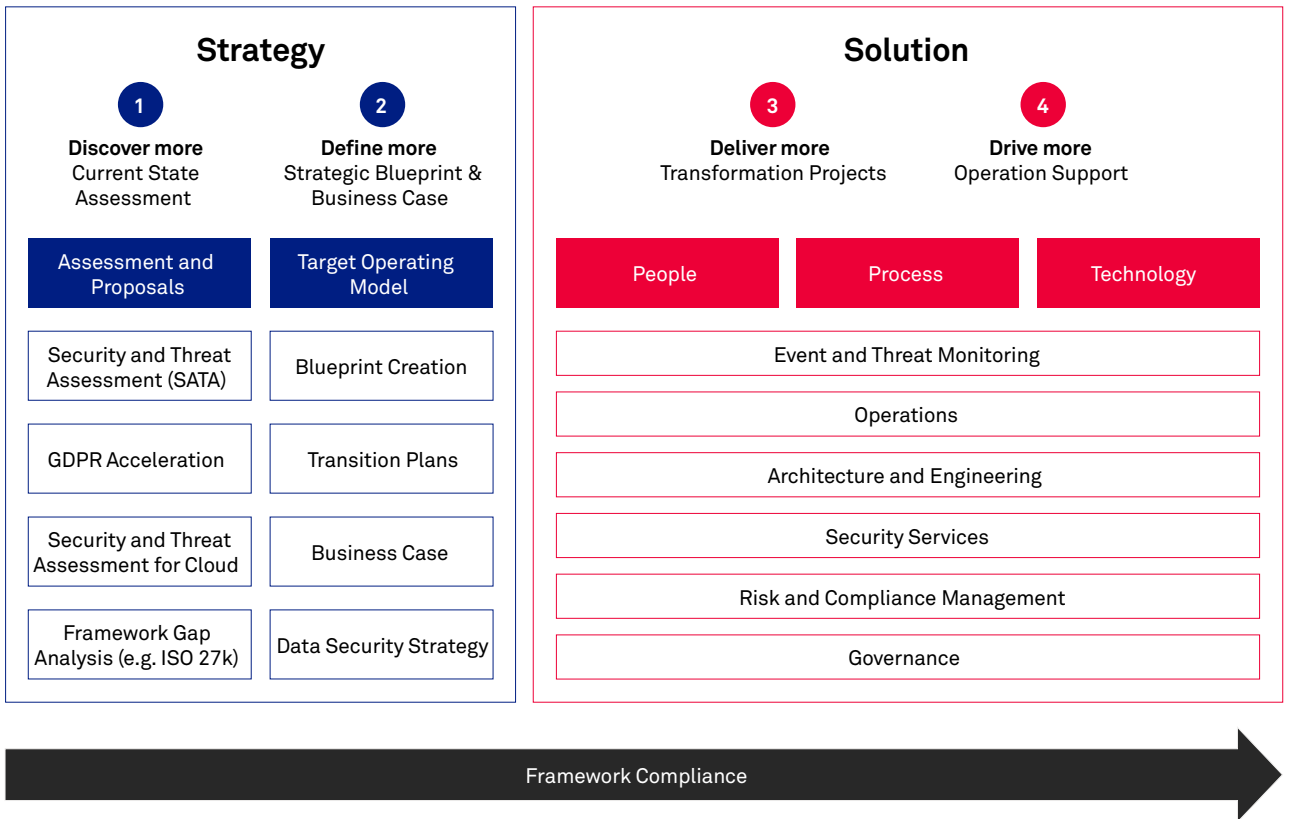

3. Deliver More

Beyond a traditional managed service, we focus on placing the right people and processes to deliver enhanced security, compliance, training and awareness programmes, crisis management workshops, and security testing.

4. Drive More

To round out the customised security solution we've delivered, we will support your organisation with services such as managed UTM, Data Loss Prevention, DDoS, Threat Intelligence, and more.
