# Azure QuickStart

Ready to embrace the cloud?
Is your infrastructure as ready as you are?

Steve Watterson
Services Director,
Telstra Purple, EMEA

Why engage on QuickStart

- Drive your understanding of the benefits and capabilities of Azure Services
- Capture your current Physical and Virtual infrastructure
- Define a strategic roadmap identifying in-flight and planned projects that could leverage Azure Services
- Establish an Azure Services Proof of Concept to demonstrate value of Azure
- Perform an Azure Services readiness assessment to identify requirements to migrate services to the cloud
- Provide a high-level migration cost estimate
- Identify risks and issues in advance of any planned migration

QuickStart services

- **Discover**: Review in-scope workloads and infrastructure
- **Assess**: Current environment assessment, existing technologies review, high priority technical and business in-flight projects
- **Evaluate**: Configure Azure PoC for test workload(s) (if required)
- **Recommend**: Identify low-impact & high-benefit workloads, provide high-level implementation costs
- **Follow-Up Engagement**: Azure Migration Planning

The Case for an Azure QuickStart

The Telstra Purple Azure QuickStart is the perfect way for you to commence on your Azure cloud journey. Whether this is your first foray into cloud or whether you are looking to assess your readiness to move workloads and applications into Azure, we will work with you to define a strategic roadmap to establish your cloud presence. Azure QuickStart helps you fast-track your decision making, with expertise that assesses the viability of your proposed cloud migration. By analysing the applications and infrastructure, Telstra Purple can determine whether services can be delivered on a cloud model. Some legacy applications may not be suitable for migration to the cloud. However, it may be possible to streamline their delivery using containerisation.

The Azure QuickStart Process

The first step is for us to understand your infrastructure and applications. We hold workshops with your teams to analyse and understand your existing infrastructure, reviewing and grouping your application requirements, workloads, system interdependencies, connectivity and latency, performance, processes, management, security and policies. We will then work with your organisation to understand any commercial drivers which could help shape your cloud journey. We will conduct interviews with key stakeholders to understand what services are working well, where improvement is required and developments that would help meet business strategy and objectives.

A migration readiness report will be produced to categorise your infrastructure, workloads and applications. This will allow us to produce a high-level migration cost determining your journey to the cloud and any remedial activities required prior to migration. The follow-on Migration Planning engagement will provide accurate costs and a detailed migration plan.

About Telstra Purple

1,500+
Experts

A team of 1500 technology experts across the globe specialising in network, cloud, security, collaboration, mobility, software, data and analytics, and design.

4
Regions

Built on a foundation of acquisitions, we are a powerhouse of demonstrable experience and expertise. We're committed to collaboration. We bring the best people across our organisation together with yours to design, build and deliver outcome-based solutions.

Best in Breed Partnerships

We've built strong global partnerships with industry leading vendors including Microsoft, AWS & Cisco but always deliver purpose-built solutions, with people at the centre.
