📋 Customised protection for your peace of mind.

🔒 Security that's the right-fit for your organisation, aligned to regulation, legislation and insurance standards.

Telstra Security Centre (TSC) located at Telstra's London Hosting

Today's ever-expanding digital landscape poses a growing number of security threats, and it can be challenging to identify, implement and maintain the measures required to safeguard organisations whilst enabling continuous innovation. That's where Telstra Security Services (TSS) take the lead.

As organisations strive to achieve increased productivity and cost efficiencies whilst seeking out the latest competitive edge, security needs to empower the business and not hinder it.

At Telstra we pride ourselves on providing managed services that are tailored to the specific needs of your organisation. Our TSS are bespoke, multi-layered solutions built on tried and tested models aligned to compliance, legislation and industry standards.

TSS are backed by Telstra's global partnerships with industry-leading technology vendors including Microsoft, Palo Alto Networks, Cisco, and Netskope.

What we'll do

Hosted from our Telstra Security Centre (TSC), Telstra will provide customised protection for peace of mind.

Telstra can engage in multiple ways, either as an extension of your own team, or a fully managed service provider that takes the pain away from day to day security management. We make sure we understand what your business values most , and how security can help accelerate success.

🖥️ Contextually-mapped and strategically-built around your specific threat profile to enable swift identification and resolution.

💻 Logical and pragmatic approach to solution adoption and deployment, helping your organisation to navigate the complexities of security.

📱 Provide clear visibility of your solution functions and any risks we might encounter along the way.

📑 End to end solutioning that grows as your business does. Understanding your security needs, designing tailored services and our experts managing them.
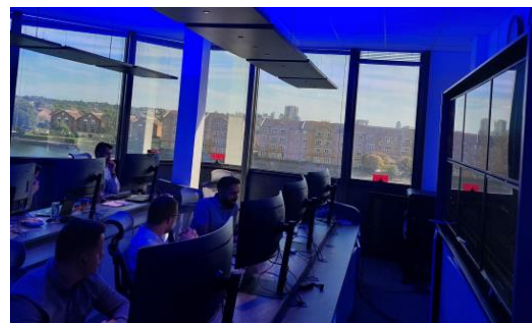

TSS components

TSS comprises of the following core solutions and services.

Consulting and Professional Services	
Governance, Risk and Compliance	Security Architecture and Engineering
Security Operations	Response and Recovery Planning
Event and Threat Monitoring	

Customer stories

Global retail chain operator: Following a significant and very public ransomware attack, Telstra were approached by this retail chain operator to enhance security across the organisation and to support the clean-up and recovery.

Leveraging our TSS framework, Telstra rapidly consulted on and deployed several security technologies including our Cyber Detection and Response capability and a suite of security management solutions. Through our TSS portfolio we continue to drive security best practices for this organisation, providing ongoing management and monitoring of their environment, taking them from recovery to now proactively deterring security threats.

Telstra Security Centre UK
