Security and Threat Assessment

Protecting what's important to your business.

Key features

- We'll profile your security risk through rigorous assessment

- Understand your alignment to cyber security standards, regulations and legislations particular to your organisation

- Develop a prioritized list of threats specific to your business, industry and digital footprint

- Receive pragmatic, actionable advice to reduce risk digital footprint

- Get advice on how to raise awareness and educate the board

What we'll do

Telstra Purple's SATA enables you to identify what's most valuable to your business, as well as what threats pose the greatest risks.

The assessment can map against regulations, legislations and best practices that you're looking to abide by and is suitable for organisations who are:

- Uncertain of their cyber security risk and exposure.

- Interested in reassessing their risk profile after a phase of investment/upgrades in cyber security people, processes and technologies.

- Looking to abide to a new framework as a result of client/contractual requirements.

- Looking to invest in cyber security but unsure on the best places to start.

Our Security and Threat Assessment (SATA) maps your organisations security and threat landscape against the increasingly complex cyber security environment.

Through this SATA, your organisation will gain access to the experience and capabilities of over 1,500 Telstra Purple consultants from across the globe. Providing in depth knowledge and expertise across different regulations and legislations.

Whilst many organisations struggle to keep pace with the complexity of cyber security risks, this assessment will bring you inline with your industry standards, best practices and even turn cyber security into a competitive advantage.

Telstra Purple's SATA will help in your alignment to ISO, Cyber Essentials, GDPR and more. To find out if we can assist in aligning to your requirements, please contract us.

Assessment objectives

Through this assessment, we will work with you to:

Provide strategic advice to address business priorities and evolving security threats.

Generate a threat assessment with clear and prioritised list of internal and external threats as well as likely threat actors.

Present your security assessment signposted to multiple compliance frameworks and rated using the Capability Maturity Model (CMM).

Deliver an executive presentation, suitable for C-level stakeholders or the board, showing the current state of security and highlighting ant major risks.

Detail our guidance and advice for the priorities and implications in order to address major security gaps and risks.

Customer stories

Howden Group Holdings: As an organisation that prides itself on digital leadership and innovation, Howden works hard to ensure its data and IT systems are secure, amid an increasingly sophisticated cyber security threat landscape.

To improve visibility of the cyber posture across all 45 countries and over 11,000 employees, Telstra Purple's UK-based team provided Howden with the care and attention associated with a niche consultancy, but with the size, scale and expertise of a global organisation.

Technical solutions and controls were implemented at each site to remediate vulnerabilities. This allowed Howden to have visibility over its cyber risk profile and reduced their exposure to cyber incidents, giving them the assurance that their data integrity remains safe and secure.
